**Subject:** PAMP Mod

Stan,

Continue with your first proposed modification to the PAMP regarding sampling frequency for COPCs: 1 round per 7-days of dredge.

Regarding proposed modification #2, discontinuing sampling during capping: we will review the data collected once available for the samples collected Fri-Sat / Sat-Sun. We are discussion options internally and will get back to you.

You mentioned modifying the silt curtain during dredging and the sampling/capping plan (expected from you this week) after the meeting today. We are discussing this internally.
